

SNÆFELLSNES

Snæfellsnes is a 90km long peninsula on the west coast of Iceland. There you can find endless breathtaking views with dramatic landscapes and diverse nature. Mystical mountains are all along the middle with numerous waterfalls, lakes, untouched lava fields, volcanic craters, and the mighty Snæfellsjökull glacier at the end of it.

The coastline is rugged, with black and golden sand alternating with sea-worn rocks and steep cliffs. Snæfellsnes has vibrant communities in charming fishing villages and rural countryside. The area is rich in culture and history that dates back to the settlement of Iceland.
